

NUBIE **A**VENTURE

Fishing Trip On Lake Nasser En Egypt

8 Days / 7 Nights

Lake Nasser

In the 1960s, a dam was built on the Nile at Aswan, resulting in Lake Nasser flooding more than 6200 km over more than 550 km of the Nile valley in southern Egypt.

Desert and wild, this region of Nubia is sparsely populated. Only fishermen stay with their traditional rowing boats and nomads including their herds of sheep, their dromedaries feeding on the low vegetation near the water. The wild fauna is rich and varied, as the famous crocodiles of the Nile, the reptiles, and more than 100 species of birds have been recorded in the area of the lake, transit point for migrants and winterers.

Fish populations of the original river system have flourished in their new habitat: tilapia and its predators, Nile perch, tiger fish and great catfish, globe fish, etc.

Our fishing trips are potentially the opportunity for anglers to catch their largest “wild” freshwater fish in their lives.

In the heart of these vast areas of natural beauty, banks with a diversity of desert landscapes, hilly, with sandy parts (dunes), they often live an adventure that they will never forget.

Duration of the trip

We offer fishing trips on Lake Nasser for a minimum of 8 days/ 7 nights, including 6 days of Fishing on Lake Nasser and 5 nights of Accommodation on board the Mother Boat, and 2 nights of hotel in Aswan (one before the stay on the Lake and another after).

Fishing season :

In reality, we can fish the Nile perch all year on Lake Nasser.

We divide the year into two seasons (summer - winter).

- **Winter season (November to March)**

In the winter, Lake Nasser have the highest level of the year and the Nile perch is at greater depth, between 6 and 12 meters, it is the best time for the big fish by trolling and casting. The fly fishing is not recommended in winter. It is the season of large Nile poles, which are however rarer, less easy to capture and fewer in number.

- **Summer season (May to October)**

In the summer, the Nile perch is in the shallower waters between 2 - 6 meters and very near to shore to can catch his foof "Tilapia".

This is the best time to shore fishing, fly fishing. At this time anglers catch a lot of fish of all sizes and can also practice trolling technique, and Casting. During these periods you can fish from the shores of the Lake, near the islands and also from your small fishing boat.

Of course, whatever the period, we do not control the size or the number of fish that will be caught, which is beyond our control!

However, we take you to the best fishing areas and advise you on technical, and equipment aspects.

April is a period of reproduction of fish, during which they remain ajeun or man, very little, therefore bite much less.

Many of our anglers preferred the summer period, despite the high temperatures on Lake Nasser, for the greater number of fish caught compared to the winter month.

Fish species:

Nile Perch, Tiger Fish, Globe Fish and Catfish.

Fishing techniques:

Trolling

Casting (on the shores of the Lake, islands or on your fishing boat)

Fly fishing
